Global Solutions Lab
Designing solutions for global and local problems

Exciting News!
2020 Global Solutions Lab
Is Going Virtual!
Same dates: June 21- June 29

More details:

The Good News:

- The 2020 Global Solutions Lab will be focused on developing strategic solutions to pandemics and climate change.
- The Lab will feature presentations by UN experts in pandemics and climate change. Plus additional experts in these topics.
- Participants will learn a powerful strategic design and planning methodology that they will use to develop their solutions.
- The Lab will include online presentations to the United Nations of the solutions developed by Lab participants.
- Because the expenses of running the program online will be less, the tuition has been drastically lowered: from \$950 to \$200.
- The number of participants the Lab can handle is now higher because we will not be limited by number of dorm rooms, etc. that are needed— BUT:

The Less Than Great News:

- The Lab will be limited in the number of participants due to the limits on the number of UN presentations we will be able to do, timezone considerations and online technical issues. If you want to participate in this historic Global Solutions Lab, sign up now. Do so [here](#). (If you have registered earlier, confirm your intention to participate in our virtual Global Solutions Lab [here](#).)

What You Will Need to Participate:

The Lab has participants from all over the world. Recognizing that different parts of the world don't all have the same level of telecommunications infrastructure, here is what you will need to participate:

- **Internet connection**, with as high speed of a connection as possible.
- In addition to a good internet connection, you will need a computer with **video and audio capabilities**. Also - you will need a relatively quiet location for having group discussions with your team members from around the world.
- **Time commitment**. The Lab is a full-time commitment-- meaning 9:00 am through early evening, every day (with breaks for meals).
- [Register](#).

The results of the 2020 Global Solutions Lab will be published as a book, similar to the above volumes that are the result of earlier Labs.

The 2020 Global Solutions Lab results will be Volume 3 in the series of Lab publications.
