Global Solutions Lab

Designing solutions for global and local problems

Global Solutions Lab Participants and Interested Applicants:

NEWSLETTER #6:

Lab Update

This year's Global Solutions Lab promises to be exciting. The topics are incredibly important— and the participants are, as you will find out, wonderful. But— we will have a problem or two given the time zone differences that our diverse participants represent. So far, there are Lab participants from three different time zones in the United States and Canada plus very different time zones in Vietnam, Great Britain and the Netherlands. Our online meetings will push some time boundaries, but it just might be a new "normal" as we all learn what a global meeting and team is all about. More on this later . . .

Some informative and Useful Sites

The following are intended to provide perspective and context, not answers or solutions. Take your time and browse through them. There will be more.

(If you haven't already [registered](#), filled out your Participant Information Form, or paid your tuition deposit, now is the time to do it.)

NASA
