

# Global Solutions Lab: The *NewWorld Game*

*Achieving the Sustainable Development Goals*  
June 17-21, 2024

The **2024 Global Solutions Lab** will use the brand new problem solving/strategic planning platform— the *NewWorld Game* — that combines the Lab's methodology with **our unique custom-trained Ai**— *plus* over 100 global statistical databases, a set of 150+ state-of-the-world reports from every UN agency and many international research organizations, and a dozen libraries of global solutions. With your perspective, knowledge, values, and experience the process of developing new, innovative, affordable, regenerative, and immediately implementable strategies for achieving one or more of the UN SDGs will be an easier, faster, more thorough, and creative process. AND— the *NewWorld Tournament* where the best strategy will be awarded a cash prize adds yet another exciting level to the Lab.

## NewWorld Tournament

Your Lab solution can be entered in the NewWorld Tournament where it will be eligible for the award of a cash prize that is used to advance your strategy towards implementation in the real world.

Register for the Lab at
